

Job Announcement Geotechnical Engineer – Intern

JOB TITLE: Geotechnical Engineer - Intern

DEPARTMENT: Geotechnical Engineering

POSITION REPORTS TO: Senior Geotechnical Engineer / Principal

Date Prepared: 3/26/2019

Closing Date: 5/1/2019

Description

Advanced Geotechnical Solutions is a full service geotechnical engineering firm founded in 2016 and based in Casper, Wyoming. We focus on using advanced exploration and geotechnical engineering analyses to better understand the soil and rock we build on.

Solid talent is hard to find, and as we continue to grow, it is imperative we add quality people who embrace a culture committed to superior client satisfaction, teamwork, professionalism and continuous learning. We are searching for an intern who fits this culture. This position has excellent growth potential for the right intern!

The right intern should thrive in a fast-paced, client service based environment. To be successful in this role, you must have strong technical problem-solving skills as well as excellent written and oral communication skills, competent with basic computer programs such as word and excel. You must be able to work independently with minimal supervision and also perform as a team member in an environment that will include other employees of the company, subcontractors, and client representatives.

Education

This opportunity is available for college students in good standing working towards a Geotechnical Engineering Degree within an accredited program. The candidate will gain experience in geotechnical engineering under direct supervision of the firm's leading engineering professionals.

Duties and Responsibilities

- Work in a safe, efficient, and detail oriented manner
- Willingness and ability to work on construction sites, performing observation and testing activities
- Work on some of the most challenging projects in the country
- Perform routine tasks, tests and computations associated with geotechnical engineering, construction materials testing, and field observations under the supervision of a geotechnical engineer.
- Perform laboratory analyses in support of construction and geotechnical engineering projects
- Collect field samples and perform field logging of exploratory test borings

- Use exceptional time management skills and have the ability to manage multiple assignments at any given time
- Be required to hold a valid driver's license, have a satisfactory driving record, and have reliable transportation in order to get to and from work.

Other Requirements:

In addition to the essential duties listed above, an intern geotechnical engineer will frequently be asked to perform miscellaneous duties that may include but not be limited to shipping soil samples and disposing of laboratory soil waste.

This position is an "outdoor/indoor position" which will entail working in all types of weather from hot and windy, to cold and icy/slippery conditions. While working indoors at the lab, the position requires reasonable attire for a professional office building. In addition, this position requires a person to be capable of routinely lifting 75 pounds.

Advanced Geotechnical Solutions, Inc is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to, among other things, race, color, religion, sex, national origin, age, status as a protected veteran, or disability. We are a drug free workplace and applicants will be required to pass a drug screen prior to employment.

Interested applicants should email their resume to INFO@AGS-West.com
