INTERNSHIP ANNOUNCEMENT

Geotechnical Engineering Internships

Advanced Geotechnical Solutions is a full-service geotechnical engineering firm founded in 2016 and based in Casper, Wyoming. We focus on using advanced exploration and geotechnical engineering analyses to better understand the soil and rock we build on.

Solid talent is hard to find, and as we continue to grow, it is imperative we add quality people who embrace a culture committed to superior client satisfaction, teamwork, professionalism and continuous learning. We are searching for team members who fits this culture. These positions have excellent future growth potential for the right candidate!

Geotechnical Engineering Internship

This opportunity is available for college students in good standing working towards a Geotechnical Engineering Degree within an accredited program. The candidate will gain experience in geotechnical engineering under the direct supervision of the firm's leading engineering professionals.

The Geotechnical Engineering intern is responsible for a variety of duties in support of the geotechnical engineering department. The intern needs to thrive in a fast-paced, client service-based environment. Basic duties include:

- Work in a safe, efficient, and detail-oriented manner
- Strong technical problem-solving skills as well as excellent written and oral communication skills
- Willingness and ability to work on construction sites, performing observation and testing activities
- Perform routine tasks, tests and computations associated with geotechnical engineering, construction materials testing, and field observations under the supervision of a senior geotechnical engineer
- Able to work independently with minimal supervision & perform as a team member in an environment that will include other employees of the company, subcontractors, and client representatives.
- Perform laboratory analyses in support of construction and geotechnical engineering projects
- Collect field samples and perform field logging of exploratory test borings
- Use exceptional time management skills and have the ability to manage multiple assignments at any given time
- Be required to hold a valid driver's license, have a satisfactory driving record, and have reliable transportation in order to get to and from work.

Advanced Geotechnical Solutions is an equal employment opportunity company with a drug free workplace. All qualified applicants will receive consideration for employment without regard to, among other things, race, color, religion, sex, national origin, age, status as a protected veteran, or disability. In addition to our competitive wages and incentives we provide the opportunity to become an integral part of the continued growth of our company.

Interested applicants should email their resume to INFO@AGS-West.com
