Solutions

## Geotechnical Engineer (3 + years experience)

Advanced Geotechnical Solutions (AGS) is actively seeking a Geotechnical Engineer with 3 or more years of experience to join our team. Tired of the monotony of your current job and would like the opportunity to excel and become a leader in the profession of geotechnical engineering, send us your resume!

### About AGS:

Advanced Geotechnical Solutions is a leading geotechnical engineering firm located in Casper, Wyoming, providing full-service geotechnical engineering and construction materials testing in Wyoming and our surrounding states. We specialize in state-of-the-art exploration and engineering to better understand the soil, rock, and environmental conditions upon which our clients build. We provide in-depth investigations, analyses, and recommendations to create safe and cost-effective projects for the communities in which we live and play. You will be joining a reputable, well-established consulting firm with over 20 years of experience.

Our exciting projects span roads and highways, dams and reservoirs, offices and warehouses, conventional and green energy, recreational facilities, and many other projects that our clients need. We deliver professional services throughout the project lifecycle, from geotechnical engineering to construction materials testing.

As we continue to grow, it is imperative we add quality people who embrace a culture committed to superior client satisfaction, teamwork, professionalism, and continuous learning. We are searching for a team member who fits this culture. This position has excellent growth potential for the right candidate!

AGS pays competitively and offers a bonus program that rewards your performance. Additionally, sick and vacation time is given upon hire, and we offer health coverage, professional development opportunities, and a retirement plan with a match. In addition to our competitive wages and incentives, we provide the opportunity to become an integral part of the continued growth of our company. Come earn some unforgettable experiences on our amazing team!

### Your Role:

As a member of the team, you would contribute to Advanced Geotechnical Solutions by:

- Preparing geotechnical design reports, including recommendations for foundations, pavement design, slope stability, etc.
- Performing routine tasks, tests, and computations associated with geotechnical engineering, construction materials testing, and field observations
- Performing laboratory analyses in support of construction and geotechnical engineering projects
- Performing geotechnical field investigations, including collecting field samples and performing field logging of exploratory test borings
- Performing construction observations
- Maintaining current laboratory AASHTO accreditations and associated records and equipment
- Attending project meetings, both in house and with clients
- Occasionally traveling and working in remote areas under adverse conditions are required

**The Ideal Candidate:**

Preferred Qualifications:

A Master's degree in geotechnical engineering and a Professional Engineering (P.E.) license

Minimum Qualifications:

A Bachelor's degree in Civil, Geological, or related engineering and an Engineer In Training (EIT) or Engineering Intern (E.I.) Certificate, with the ability to obtain a P.E. license within 12-18 months

Or

Have a P.E. license with extensive coursework and fieldwork in geotechnical engineering over the past three years

**Additional Information:**
