

Advanced **Geotechnical**
Solutions

Entry-Level Geotechnical Engineer

Did you study Geotechnical Engineering in college or decide they were your favorite courses and want to know more?!? Advanced Geotechnical Solutions (AGS) is a geotechnical engineering firm looking to hire full-time Entry-level Geotechnical Engineers to join the team in Casper, Wyoming. Grow your career with us by working on dynamic projects in various industries and engaging in work that positively impacts our community and the region! Become part of a reputable and well-established consulting firm with over 25 years of combined experience. If you want to excel in geotechnical engineering, send us your resume!

We leverage cutting-edge technology and efficient processes and use our geotechnical engineering expertise to deliver the most valuable recommendations for our clients. We partner with civil engineering firms, construction companies, municipalities, mineral exploration and extraction companies, renewable energy, and more.

Why AGS:

We provide in-depth explorations, analyses, and recommendations to create safe and cost-effective projects for the communities in which we live and play. At AGS, you will work together with our strong team of professional engineers and staff as you grow your career. Our clients highly value AGS's excellent work quality, responsiveness, and ability to efficiently mitigate risks from complex geotechnical engineering challenges.

We are a company that focuses on retaining our employees, and we have been successful in doing so by offering a competitive compensation package, providing opportunities to work on exciting and challenging projects, supporting career development, and creating a great team environment. As AGS continues to grow, our staff has grown along with us. This position offers great potential for career advancement!

Your Role:

As a member of the team, you will contribute by:

- Performing geotechnical field investigations
- Drafting geotechnical engineering reports
- Preparing cost estimates and proposals
- Performing routine tests and computations associated with geotechnical engineering, construction materials testing, and field observations
- Performing laboratory testing and analyses in support of construction and geotechnical engineering projects
- Help in maintaining current laboratory AASHTO accreditation records and equipment
- Attending project meetings, both in-house and with clients
- Occasional travel and work in remote areas under adverse conditions
- Occasional lifting of approximately 75 pounds

Qualifications:

- 0-4 years of experience for Entry-Level

Advanced **Geotechnical**
Solutions

- Bachelor's degree in Civil Engineering, Geological Engineering, or a related engineering field; Master's degree in Geotechnical Engineering or related is preferred
- Completion of the Fundamentals of Engineering/Engineer-In-Training (EIT) exam or scheduled
- Valid driver's license with an acceptable driving record
